

Erased Writing Detection Kit

This is the most complete erased writing detection kit available. It enables the investigator to restore erased writing with chemical or fuming reagents. An ultraviolet light is included for preliminary inspection of the questioned document prior to chemical treatment. A 5X magnifier is a necessary addition to the kit. The ultraviolet light may be converted to white light for microscope illumination. Individual applicator vials are provided for increased storage life and cross-contamination control.

Content List

- ✓ 1-Iodine Print Fixative, 1 oz. (30ml)
- ✓ Iodine Print Fixative Remover, 1 oz. (30ml)
- ✓ Iodette Ampoules, 3g, 6 ea.
